

Wonderstruck Online Presents...

# Forces & Energy

## What's it about?

So where do we get energy from and what can we use it for?

That's the main thrust behind this exciting show. We look at different sources and types of energy and how we can use those different types in different ways.

We also look at how we can transform one type of energy to another and why that's incredibly useful!

## Who's it for?

We recommend this show for KS2&3 students but we're happy to run it with other age groups and can differentiate accordingly. It also makes for an exciting birthday party treat in these socially-distanced times!

## What does it cost?

A snip at £80.00 plus VAT per session!

**WONDERSTRUCK**  
SCIENCE ON FIRE

'Great demonstrations, clearly explained.'

I wouldn't do that on MY tabletop.'

KS2 Teacher

## Show Requirements

All you need is a decent broadband connection, Zoom or MS Teams and a big enough display so that everyone can see.

It helps if we can also see and hear you, particularly if you would like the Q&A session afterwards.

## The Science

The STEM content of the show is wide ranging, but the main topics covered are:

- Forces
- Energy
- Applications of science

We can differentiate content according to age group.

## Duration

The show runs for 30 minutes and we have a Q&A session for 15 minutes afterwards.
