

Wonderstruck Online Presents...

The Supersonic Sideshow

What's it about?

In the Supersonic Sideshow we explore the link between sound and vibration.

Along the way we smash a wine glass with sound, visualise a sound wave with fire and see how they make those laser space battle effects in your favourite sci-fi movies plus plenty more.

We can also supply a kit for making simple speakers as a follow up activity.

Who's it for?

We recommend this show for KS2&3 students.

We're happy to run it with other age groups and can differentiate accordingly. It also makes for an exciting birthday party treat in these socially-distanced times!

WONDERSTRUCK
SCIENCE ON FIRE

‘Amazing to see the glass being shattered like that with just sound energy!’

KS2 Teacher

Show Requirements

All you need is a decent broadband connection, Zoom or MS Teams and a big enough display so that everyone can see.

It helps if we can also see and hear you, particularly if you would like the Q&A session afterwards.

The Science

The STEM content of the show is wide ranging, but the main topics covered are:

- Sound & vibration
- Energy
- Applications of science

We can differentiate content according to age group.

The Cost

A snip at £80.00 plus VAT per session!

If you want the speaker making kit for a follow up activity drop us an email with some details (numbers, age group etc) and we'll get back to you with a bespoke price.

Duration

The show runs for 30 minutes and we have a Q&A session for 15 minutes afterwards.
